Project Benefits

Expected to add millions of dollars in tax revenue to the local community

Project enables a reliable and stable electric grid

Supports 20-40 jobs over the course of construction

Keeps the lights on during extreme weather events

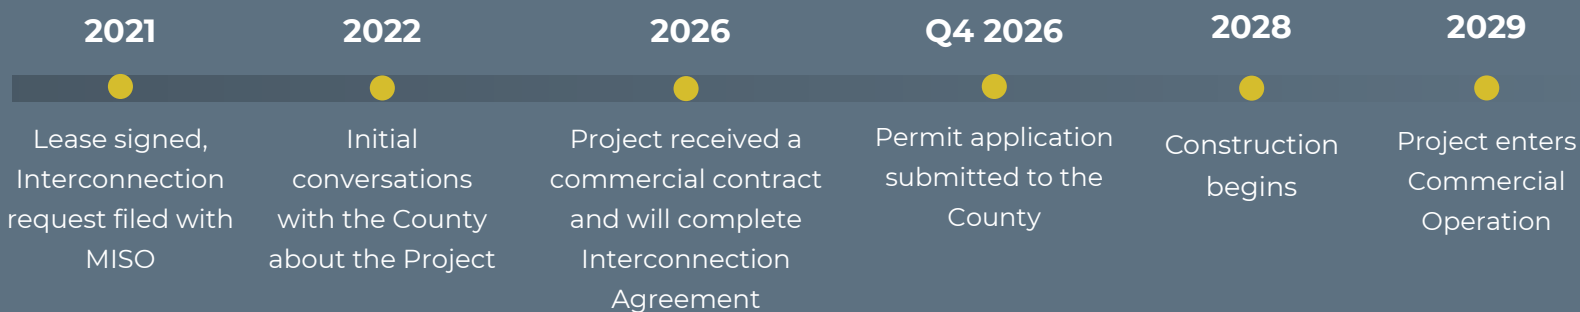

Why BESS

Battery Energy Storage Systems (BESS) support a stable and reliable electric grid across Illinois.

- Instantly dispatchable to meet local energy needs
- Battery energy storage enhances grid reliability
- Helps keep the lights on during high demand and extreme weather events
- KCE IL 2 will support 20-40 union jobs during construction and is expected to provide millions of dollars in anticipated taxes to support the local community

Project Timeline

About Key Capture Energy

200 MW, 2 Projects

In development across the state

16 States

Across the U.S. with operating and planned projects

85-Person Team

Employees in over 20 States

14 Operating BESS in the US

Over 620 MW

KCE + Community Engagement

KCE prides itself on being a trusted and valued member of the communities where our projects are located. We work with our host communities proactively and constructively. KCE works directly with fire and safety officials during the development, construction and operation of our projects.

About Key Capture Energy

KCE is building battery energy storage solutions that ensure a resilient electric grid and generate meaningful, lasting value for our communities and partners.
